I am writing to apply for the Projektingenieur / Projektleiter TGA / HKLS position at Riverstate Premium Recruiting. While my professional background is in software engineering, I bring strong project management, technical documentation, and cross-functional coordination skills that are directly relevant to this role.

Through my experience as a Web Developer, I have managed end-to-end project lifecycles for complex web applications. This includes gathering requirements, creating technical specifications, estimating costs and timelines, coordinating with stakeholders, and delivering projects on schedule. I am comfortable preparing documentation and managing subcontractor relationships.

One area that particularly interests me is the opportunity to work on diverse, large-scale projects for municipal clients. I have experience working with government and enterprise stakeholders, and I understand the importance of clear communication, documentation, and compliance in public-sector projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
