I am writing to apply for the (Senior) Revenue Operations Manager role at clockin GmbH. The opportunity to build and optimize the operational backbone of a growing SaaS company aligns well with my technical background and problem-solving approach.

My experience as a full-stack developer has given me a strong foundation in automation, data integrity, and system integration. I have designed and implemented automated workflows, built RESTful APIs, and worked extensively with databases including MySQL and PostgreSQL. I understand the importance of clean, reliable data and have established data hygiene routines in previous projects to ensure consistency and trustworthiness in reporting.

A relevant example is my work on a real-time server health monitoring dashboard. I built a system that streams live metrics to the browser using Socket.IO, with role-based access control and a fully Dockerized production setup. This project required careful attention to data quality, automated alerting, and scalable architecture, all of which are directly applicable to managing HubSpot pipelines, workflows, and dashboards.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to clockin GmbH’s growth.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
