I am writing to apply for the (Senior) Operations Controller (m/w/d) position at gocomo GmbH. Your focus on building transparency in projects, analyzing operational KPIs, and enabling data-driven decisions across the company aligns with my own approach to structured problem-solving and process optimization.

While my professional background is in software engineering, I have consistently worked at the intersection of data, operations, and cross-functional collaboration. In my recent role, I built and maintained systems that tracked key performance indicators, monitored project health, and provided real-time visibility into operational metrics. This required the same analytical rigor, attention to data quality, and ability to translate numbers into clear recommendations that this role demands.

One area that particularly interests me is the opportunity to help develop and improve reporting processes and BI systems. I have hands-on experience working with databases, building dashboards, and ensuring data integrity across multiple sources. I am comfortable with the technical side of data management and can contribute to the continued development of your CRM, ERP, and reporting landscape.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how my analytical and operational skills can support gocomo GmbH’s growth. Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
