I am writing to apply for the IT Security Coordinator (m/w/d) position at hubside - Die Recruitingwerkstatt in Munich. The role's focus on coordinating security initiatives, managing project overviews, and bridging IT with business stakeholders aligns well with my technical background and collaborative working style.

My experience in cybersecurity comes from both academic research and hands-on project work. I have designed secure communication protocols using encryption methods such as AES and secure key exchange, and I have explored privacy-preserving frameworks for autonomous vehicle networks. This work has given me a solid understanding of IT security principles, risk assessment, and the importance of regulatory compliance.

In previous professional roles as a web developer, I coordinated closely with cross-functional teams, tracked project milestones, and ensured alignment between technical requirements and business goals. I am comfortable maintaining roadmaps, monitoring dependencies, and preparing status reports for management reviews. My experience with Linux server administration, Docker, and CI/CD pipelines also supports the technical coordination aspects of this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team's security coordination efforts.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
