I am writing to apply for the PPC Kampagnen Manager/in position at ClickScale. Your focus on structured tracking and performance-driven campaign management aligns with my technical approach to solving problems.

Through my work as a Web Developer, I have built systems that rely on accurate data collection, real-time monitoring, and performance optimization. I understand how tracking structures impact decision-making and why clean, organized data matters for campaign success. My experience with API integrations and database management gives me a practical understanding of how tracking systems work under the hood.

One area that particularly interests me is the technical side of campaign management. I have worked with authentication systems, payment gateways, and role-based access control in web applications, which has given me a methodical approach to testing, debugging, and optimizing workflows. I am comfortable analyzing data, identifying patterns, and making adjustments based on measurable results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical background can support ClickScale’s performance marketing goals.

Sincerely,

Md Shahanur Islam Shagor
