I am writing to apply for the Content Writer II position at EbizON. Your focus on creating well-researched, grammatically precise content across diverse topics such as technology, marketing, and travel aligns with my ability to produce clear and accurate written work.

Although my primary expertise is in software engineering, I have consistently written detailed technical documentation, project descriptions, and research summaries throughout my development career. This has required me to research thoroughly, verify facts, and present information in a concise and accessible manner.

I am comfortable working independently with minimal supervision, managing my own schedule, and adhering to specific content guidelines. My experience delivering projects on time while maintaining quality standards supports the self-directed workflow this role requires.

In addition to my written communication skills, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my writing and research abilities can contribute to EbizON’s content team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
