I am writing to apply for the Customer Service Representative position at Premera Blue Cross. Your mission to improve people's lives through meaningful work aligns with my own approach to delivering reliable, human-centered support in every role I take on.

Although my professional background is in software engineering, I have consistently worked in roles that require clear communication, active listening, and patient problem-solving. Whether collaborating with stakeholders on project requirements or assisting teammates with technical challenges, I have learned to explain complex topics simply and to focus on what the other person actually needs.

One area that particularly interests me is the opportunity to support people directly. In my previous work as a web developer, I regularly communicated with clients to understand their goals, troubleshoot issues, and ensure satisfaction with the final product. These experiences taught me to stay calm under pressure, ask the right questions, and follow through until a problem is fully resolved.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how my communication skills and dedication to quality service can contribute to the Premera Blue Cross team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
