I am writing to apply for the Consumer Services Marketing Account Director position at Power Digital. Your firm's position at the intersection of marketing, consulting, and data intelligence is compelling, and I am drawn to the mission of powering growth through innovation and results.

My professional experience has been centered on building technology systems that handle data, automate workflows, and deliver measurable outcomes. While my background is in software engineering rather than marketing account management, I have developed strong analytical and technical skills that are directly relevant to understanding and optimizing growth strategies.

In my work as a full-stack developer, I have built platforms that process first-party data, integrate with analytics tools, and generate reports that inform business decisions. I am comfortable working with data pipelines, API integrations, and dashboard systems that provide visibility into performance metrics. This technical foundation allows me to understand how data flows through marketing technology stacks and how to interpret the results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background could contribute to Power Digital's continued growth.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
