I am writing to apply for the Capital Planning Investment Control Business Analyst Lead position at Aretum. Your mission to deliver technology-enabled solutions across defense, civilian, and homeland security sectors aligns with my experience in building secure, scalable systems and collaborating on complex projects.

My professional background includes developing and maintaining full-stack web applications, managing RESTful APIs, and implementing role-based access control and authentication systems. I have worked with Linux servers, Docker, Nginx, and CI/CD pipelines to deploy and maintain production applications. These technical skills support the IT governance, investment lifecycle, and reporting requirements central to this role.

In my work as a Web Developer, I have been responsible for delivering features on time, communicating with stakeholders, and ensuring that systems align with project goals. I have experience mentoring junior team members, reviewing code, and maintaining documentation. This has prepared me to oversee analysts and support gate review preparation as described in the job summary.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.
