I am writing to apply for the Program Manager role at MedTech Innovator. Your mission to support healthcare startups and scale-ups through innovation-focused programs aligns with my interest in building systems that enable meaningful real-world impact.

Through my professional experience, I have developed strong organizational and project coordination skills while managing full-stack web application projects from concept to delivery. I have worked across multiple teams, maintained detailed project documentation, managed timelines and deliverables, and coordinated communications between developers, stakeholders, and external partners. This has given me practical experience in building operational structure and improving processes in collaborative environments.

One area that particularly interests me is supporting application and evaluation workflows. I have experience developing and maintaining operational systems, trackers, and internal documentation to ensure smooth execution across initiatives. I am comfortable identifying bottlenecks, coordinating solutions, and facilitating meetings to keep projects on track.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am drawn to MedTech Innovator’s fully remote, mission-driven environment and the opportunity to help shape programs that support emerging healthcare technologies. I have attached my CV for your review and welcome the opportunity to discuss how my background can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
