I am writing to express my interest in the Web Developer position in Germany. With over 4 years of professional experience building modern web applications, I am confident in my ability to contribute effectively to your team.

My technical focus has been on full-stack development using Laravel and Next.js, combined with React, TypeScript, and Tailwind CSS for the frontend. I have built and integrated RESTful APIs, implemented secure authentication and role-based access control, and worked with both MySQL and PostgreSQL databases. Performance optimization through query tuning, caching, and database indexing has been a consistent part of my workflow.

In my professional experience at Explo-IT, I delivered scalable web applications that included real-time features using WebSockets, responsive and SEO-friendly interfaces, and secure payment gateway integration. I also handled deployment and maintenance on Linux servers using Nginx, Docker, and CI/CD pipelines. This hands-on experience has given me a practical understanding of the full development lifecycle, from architecture to production.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with your needs. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
