I am writing to apply for the Handyman position at Sivananda Ashram Yoga Retreat Bahamas. Your community's commitment to operational excellence in service of holistic well-being is something I genuinely respect, and I would be glad to contribute to maintaining a safe and welcoming environment for guests and staff.

My background is primarily in software engineering, but I have developed strong hands-on technical skills through extensive work with hardware systems. I have built and maintained systems using Raspberry Pi, ESP32, and NVIDIA Jetson Nano, which required me to become proficient with hand tools, power tools, and basic electrical components. I am comfortable replacing light fixtures, troubleshooting minor electrical issues, and performing general repairs.

In previous work, I have independently managed hardware setups, repaired enclosures, and maintained equipment in working condition. I approach each task with attention to detail and take pride in delivering neat, high-quality work. Whether it is patching drywall, painting, or replacing a faucet, I focus on getting the job done right.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can support the retreat's maintenance needs. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
