I am writing to express my interest in joining Vermont SportsCar. While I understand there is no specific open position listed at this time, I would like to submit my background for future consideration as your team grows.

My professional experience spans full-stack web development, AI engineering, and autonomous systems. Over the past four years, I have built and deployed production-grade web applications using Laravel, Next.js, React, Node.js, and Go. I have developed RESTful APIs, implemented secure authentication and role-based access control, integrated payment gateways, and optimized database performance with MySQL and PostgreSQL. I have also worked with real-time communication systems using WebSockets and Socket.IO, and deployed applications on Linux servers with Docker, Nginx, and CI/CD pipelines.

In addition to web development, I have research and hands-on experience in AI and autonomous systems. I have worked on computer vision projects using YOLOv8, developed real-time object detection pipelines on edge devices like Raspberry Pi and NVIDIA Jetson Nano, and designed secure communication protocols for UAV networks. My work includes building a Wireless Vision-Aid for the Blind and a Privacy-Preserving Blockchain Framework for Autonomous Vehicles, both of which combine AI, cryptography, and real-time system design.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills could contribute to Vermont SportsCar’s future projects.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
