I am writing to express my interest in joining the freelance production roster at FRED & FARID Paris. Your focus on building a trusted network of production talent that can be activated based on project needs aligns with how I prefer to work.

Through my work as a full-stack developer and system architect, I have managed complex projects from initial concept through final delivery. This involved coordinating with creative teams, defining production timelines, tracking budgets, and ensuring that deliverables met quality standards. I am comfortable working across multiple projects simultaneously while maintaining organization and attention to detail.

One area that particularly interests me is the operational and logistical coordination required in production environments. In previous work, I have sourced and coordinated with external partners, managed administrative workflows, and helped identify potential risks early in the project lifecycle. I approach each project with a focus on clear communication and practical problem-solving.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I would welcome the opportunity to discuss how I can contribute to FRED & FARID’s upcoming projects.

Sincerely,

Md Shahanur Islam Shagor
