I am writing to apply for the Regional Sales Director EMEA position at SpyCloud. Your mission to disrupt the criminal underground and protect over 4 billion accounts aligns with my own focus on building secure, resilient systems that defend against real-world cyber threats.

What stands out to me about SpyCloud is the direct impact your solutions have on preventing cyberattacks at scale. The opportunity to work with a company that combines technical depth with a clear security mission is compelling.

Through my research and development work in cybersecurity, I have built a thorough understanding of how anti-fraud and security solutions operate under real-world conditions. My work on the Privacy-Preserving Blockchain Framework for Autonomous Vehicles involved designing decentralized communication protocols, implementing Zero-Knowledge Proofs, and addressing post-quantum cryptographic threats. This experience has given me a practical grasp of what makes security products effective and how they protect users against sophisticated attacks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical cybersecurity background could support SpyCloud’s mission in the EMEA region.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
