I am writing to apply for the Director Senior Director Sales New York position at Super League. Your focus on owned-and-operated games, audience intelligence, and immersive brand activations is genuinely interesting. The idea of connecting brands with play-first audiences through creative, measurable experiences is something I find compelling.

My background is in full-stack development and AI engineering, where I have built scalable web platforms and real-time systems. I understand the technical infrastructure behind gaming platforms, including authentication, real-time communication, and secure payment flows. This technical fluency allows me to communicate credibly with both development teams and brand partners.

In my professional experience as a Web Developer, I worked across product delivery, API integration, and frontend implementation while collaborating closely with stakeholders. I am comfortable owning the full cycle of a project from initial discussion to deployment and can translate technical capabilities into clear value propositions for clients.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to Super League’s growth in the New York market.

Sincerely,

Md Shahanur Islam Shagor
