I am writing to express my interest in the Art Director freelance opportunity at PixelPier/Celsius Studios. Your emphasis on design craftsmanship and brand identity aligns with my approach to building visually cohesive digital experiences.

Through my work as a full-stack developer and designer, I have developed a strong foundation in UX design, visual hierarchy, and brand consistency. I have used Figma extensively for prototyping and design systems, and I have implemented those designs using Tailwind CSS, MaterialUI, and Bootstrap across multiple production applications. This combination of design thinking and technical implementation allows me to create interfaces that are both beautiful and functional.

One area that particularly interests me is the intersection of brand design and user experience. In previous projects, I have designed complete UI systems for travel platforms, real estate applications, and financial tools. Each project required careful attention to typography, color theory, spacing, and visual storytelling to create a cohesive brand identity that resonated with users. I approach design as a problem-solving discipline, where every visual decision serves both aesthetic and functional goals.

In addition to my technical and design experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I would welcome the opportunity to contribute to PixelPier’s creative projects and would be happy to discuss how my design background can support your team.

Sincerely,

Md Shahanur Islam Shagor
