I am writing to apply for the Video Editor position at Marz. Your focus on high-velocity short-form content for creators and brands aligns with my own interest in creating engaging, retention-focused media. While my core expertise is in software engineering, I bring a strong design sensibility and a fast-learning mindset that I believe will translate well into video editing.

What stands out to me about this role is the emphasis on speed, clean cuts, and adapting editing styles across different niches. I have worked extensively with visual tools like Figma and have built user interfaces that prioritize clarity, pacing, and user retention. These skills give me a solid foundation for understanding how hooks, transitions, and audio pacing work together to keep viewers engaged.

In my previous work as a Web Developer, I collaborated closely with designers and content teams to deliver polished, responsive products. I am comfortable iterating quickly, experimenting with formats, and maintaining a high standard of quality under tight deadlines. I am confident I can apply this same discipline and creativity to editing Reels, TikToks, and YouTube Shorts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and adaptability can contribute to the creative work at Marz.

Sincerely,

Md Shahanur Islam Shagor
