I am writing to apply for the Social Media Manager position at contean Gruppe. Your focus on a modern AI toolchain and living content that delivers lasting impact caught my attention. I am particularly interested in how you combine strategic content work with practical technology to serve well-known brands.

My background is in full-stack and AI engineering, where I have built and deployed production systems that integrate Generative AI for content creation. In my project work, I have developed AI assistants using OpenAI's latest models and integrated image processing APIs, directly aligning with your interest in Generative AI for content production. This technical experience allows me to quickly adopt and optimize AI-driven workflows.

I am accustomed to working with data and using performance metrics to guide decisions. My engineering background has given me a structured, analytical approach to problem-solving, which I can apply to content strategy, performance analysis, and platform optimization. I am confident in my ability to learn new tools and platforms rapidly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team at contean Gruppe.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
