I am writing to apply for the Client Service Director position at conteamt gruppe. Your agency's track record with major brands like DB Schenker, Volkswagen, and Swiss Life, combined with your focus on integrated campaigns across multiple disciplines, is impressive. I am particularly drawn to your emphasis on quality, modern tools including an AI toolchain, and the stability of an owner-led group with short decision-making paths.

While my professional background is in software engineering and AI, I have spent years managing complex client relationships in a technical context. In my role as a Web Developer at Explo-IT, I was responsible for understanding client requirements, translating business goals into technical specifications, and ensuring delivery aligned with expectations around quality, timeline, and budget. This required building trust, communicating clearly with non-technical stakeholders, and proactively identifying opportunities to expand existing engagements.

One area that particularly interests me is your mention of an AI toolchain that accelerates workflows. I have hands-on experience integrating AI into practical systems, including building AI-powered assistants and automation pipelines for financial and real estate applications. I understand how technology can create measurable efficiency gains and competitive advantages for clients, and I am comfortable bridging the gap between technical capabilities and business strategy.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my client management experience and technical perspective can contribute to conteamt gruppe's continued success.

Sincerely,

Md Shahanur Islam Shagor
