I am writing to apply for the C# Backend Entwickler position at Intercon Solutions GmbH. Your focus on building scalable cloud applications for international travel operators aligns with my experience in backend development and API integration.

My technical background includes working with C#, SQL databases (MySQL, PostgreSQL), and building RESTful APIs. I have hands-on experience with Docker and Kubernetes for containerized deployments, and I have worked with cloud platforms such as AWS and Google Cloud. I am comfortable designing modern software architectures and integrating external services.

In previous work, I developed and maintained backend services for web applications, focusing on API design, database optimization, and real-time features. I have experience with authentication systems, role-based access control, and payment gateway integration. I also have practical knowledge of deploying and monitoring applications on Linux servers using Nginx, Docker, and CI/CD pipelines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
