I am writing to apply for the Retoucher / Compositing Artist position at conteam gruppe. Your focus on high-end automotive campaigns and the opportunity to work with CGI, AI workflows, and motion compositing is particularly interesting to me.

Through hands-on project development, I have built AI-powered systems that involve real-time image processing and object detection. For example, I developed WVAB (Wireless Vision-Aid for the Blind), a system that uses YOLOv8n for real-time object detection and delivers audio feedback. This required working with computer vision pipelines, optimizing for low latency, and integrating hardware and software components. I am comfortable with the technical side of image processing and automation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in AI and automation could contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
