I am writing to apply for the Stellvertretender Werkstattleiter position at Riverstate Premium Recruiting. While my career has been in software engineering and system architecture, I bring a strong foundation in technical problem-solving, process coordination, and structured workflow management that translates well into workshop leadership.

In my previous roles as a Web Developer, I was responsible for coordinating project tasks, managing timelines, and ensuring quality delivery across multiple concurrent assignments. I regularly communicated with stakeholders to clarify requirements, resolve technical issues, and ensure smooth handoffs. This experience has given me a practical understanding of how to organize work, support team members, and maintain operational flow under pressure.

One area that particularly interests me is the opportunity to take on responsibility for workshop coordination and customer communication. I am comfortable explaining technical concepts to non-technical audiences and have experience supporting users through complex problem-solving scenarios. My ability to stay organized and solution-focused would allow me to effectively support the workshop team and ensure that vehicles and equipment are handed over to customers professionally.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my technical mindset, organizational skills, and commitment to quality would make me a reliable addition to your workshop team. I have attached my CV for your review and look forward to discussing how I can contribute to Riverstate Premium Recruiting.

Sincerely,

Md Shahanur Islam Shagor
