I am writing to apply for the Softwareentwickler (gn) C# und Cloud position at Broeder Ruckh Consulting GmbH. The opportunity to work on medical software products in a regulated, agile environment aligns well with my background in building reliable and scalable systems.

Through my professional experience, I have developed software using C# and .NET, and I have worked extensively with cloud infrastructure. I have deployed containerized applications using Docker and Kubernetes, and I have set up CI/CD pipelines to streamline development and deployment workflows. I am also familiar with Infrastructure as Code concepts.

In previous roles, I built and maintained RESTful APIs, implemented authentication and role-based access control, and optimized database performance. I have experience working with Linux servers, Nginx, and monitoring tools like Prometheus and Grafana. I am comfortable analyzing requirements, writing clear documentation, and collaborating with cross-functional teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and experience can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
