I am writing to apply for the PR Manager role at getpress. Your vision of building a KI-first, outcome-driven PR company is exactly the kind of environment where I can contribute meaningfully.

While my professional background is in software engineering and AI, I have worked extensively with LLMs and AI workflows. Through hands-on project development, I have built systems that integrate OpenAI models, real-time data processing, and automated pipelines. I understand how to use AI as a tool to accelerate research, generate insights, and free up time for higher-value strategic work.

One area that particularly interests me is your internal AI stack. In my work, I have developed AI-powered assistants for financial analysis and real estate, trained models on custom datasets, and built automation workflows that reduce manual effort. I am comfortable working with AI systems not just as a user, but as someone who can shape and improve them.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can combine my technical skills with strategic thinking, and getpress offers exactly that opportunity. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
