I am writing to apply for the Systemplaner / Fachplaner position in Technische Geb^/udeausr^…stung with your client, a mid-sized engineering firm based in North Rhine-Westphalia. While my professional background is in software engineering rather than traditional HVAC or sanitation planning, I bring strong system design capabilities, structured project management experience, and a methodical approach to technical problem-solving that aligns well with the responsibilities of this role.

Through my professional experience as a Web Developer, I have managed complex, multi-phase projects from concept through delivery. I am accustomed to creating detailed technical specifications, coordinating with stakeholders including clients and suppliers, and maintaining precise documentation throughout the project lifecycle. These skills in planning, specification writing, and cross-functional communication are directly applicable to the tasks outlined for this position, including the creation of detailed plans and coordination with builders and authorities.

One area that particularly interests me is the emphasis on sustainable engineering, including heat recovery from industrial processes, hydrogen utilization, and CO2 reduction. My background in systems thinking and optimization, developed through building scalable software architectures, gives me a strong foundation for understanding and contributing to energy-efficient building system design. I am confident in my ability to quickly learn industry-specific software and apply my technical aptitude to TGA planning tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am organized, detail-oriented, and accustomed to working both independently and as part of a team.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical system design experience and structured approach can contribute to your client’s industrial projects. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
