I am writing to apply for the Freelance Study Coordinator (Oncology / Clinical Trials) position at Subject Well Inc. Your mission to accelerate patient enrollment in clinical trials and help patients access life-changing medications is meaningful work that I would be proud to support.

Although my professional background is in software engineering and AI, I have developed strong organizational and coordination skills through managing complex, multi-stakeholder projects. In my previous work as a Web Developer, I coordinated between clients, team members, and third-party services to deliver reliable systems on time. This experience has taught me to communicate clearly, document thoroughly, and respect confidentiality in every interaction.

I understand that this role requires empathetic, unscripted conversations with cancer patients about clinical trial options. I am comfortable discussing sensitive topics with professionalism and respect for patient autonomy. I am fluent in English and have working knowledge of Russian and Hindi, which supports clear communication in diverse settings.

I am organized, detail-oriented, and committed to maintaining ethical standards in all patient interactions. I would welcome the opportunity to contribute to your team and support cancer patients in understanding their clinical trial options.

I have attached my CV for your review and look forward to discussing how I can support Subject Well Inc.’s important work.

Sincerely,

Md Shahanur Islam Shagor
