I am writing to apply for the Projektleiter / Gutachter (m/w/d) position at clayton Umwelt-Consult GmbH. Your company's long-standing expertise in environmental consulting and geotechnical assessments is impressive, and I am interested in contributing to your team.

Through my work as a software engineer, I have developed strong analytical and organizational skills that are directly relevant to this role. I have experience managing complex data sets, coordinating technical investigations, and ensuring accuracy in reporting. These skills translate well to the responsibilities of planning and coordinating environmental site assessments, evaluating analytical data, and preparing technical reports.

In my professional experience, I have worked closely with clients and project partners during project initiation and throughout delivery. I am comfortable communicating technical information clearly and maintaining reliable workflows under deadlines. I also have a solid foundation in MS-Office and data management tools, which supports efficient lab management and data evaluation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in growing within a stable, team-oriented environment like clayton and would welcome the opportunity to discuss how my background can support your projects. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
