I am writing to apply for the Junior-Controller position at Stellantis &You Deutschland GmbH. Your company's extensive network of 380 dealerships across Europe and commitment to combining innovative comfort with environmentally friendly technology is impressive. I am interested in contributing to your team in Hamburg.

My background is in software engineering, where I have developed strong analytical and data-driven problem-solving skills. Through my work, I have gained experience in analyzing system data, identifying trends, and creating reports that support decision-making. I am comfortable working with databases and data analysis tools, which aligns with the reporting and analysis responsibilities of this role.

In my professional experience, I have regularly worked with data to monitor system performance, identify optimization opportunities, and track the impact of implemented changes. This involved creating clear documentation of processes and results, coordinating with different teams, and ensuring that information was accurately tracked and communicated. These skills translate directly to supporting budget planning, cost analysis, and the preparation of monthly reports.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my analytical skills and structured approach can support your controlling team in Hamburg.

Sincerely,

Md Shahanur Islam Shagor
