I am writing to apply for the Werkstudent im Recruiting position at EMIL Group GmbH. Your focus on supporting the full recruiting process for tech and non-tech profiles, combined with the opportunity to work closely with a Senior Recruiter, is exactly the kind of hands-on learning environment I am looking for.

What stands out to me about this role is the chance to contribute to active sourcing, candidate experience, and end-to-end recruiting while gaining practical insight into modern recruiting strategies. As a Software Engineering student with strong organizational habits and a structured approach to work, I am comfortable managing multiple tasks, coordinating interviews, and maintaining accurate candidate data.

Through my professional experience as a Web Developer, I have developed reliable communication skills and the ability to work closely with team members across different functions. I am used to coordinating tasks, following processes carefully, and ensuring that nothing falls through the cracks even under time constraints. These habits translate naturally into supporting a recruiting workflow.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would be glad to discuss how I can support the EMIL Recruiting Team and contribute to your talent acquisition efforts.

Sincerely,

Md Shahanur Islam Shagor
