I am writing to apply for the Business Analyst position at Rotaract Club of Singapore Management University (SMU). The opportunity to support data-driven decision-making and improve business processes aligns with my analytical background and interest in translating complex needs into clear, actionable requirements.

Through my work as a software engineer, I have developed a structured approach to problem-solving and process analysis. I have experience conducting research, mapping workflows, and identifying gaps in existing systems. My technical background allows me to understand both business objectives and the systems that support them, making me effective at bridging communication between stakeholders and development teams.

In my professional experience, I have collaborated with cross-functional teams to gather requirements, document processes, and implement solutions. I have used SQL for data analysis, prepared reports and dashboards for management review, and ensured that project outcomes aligned with business goals. This hands-on experience has given me a practical understanding of the full project lifecycle and the importance of clear documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical skills and experience can contribute to the Rotaract Club of SMU.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
