I am writing to apply for the Docente de Educaciˆ‡n Infantil Virtual position at Colegio Cambridge International Education. While my professional background is in software engineering, I bring strong technical and communication skills that are directly relevant to designing and delivering engaging virtual learning experiences for young children.

Through my work as a web developer, I have built interactive platforms using React, Next.js, and Tailwind CSS. These tools are well-suited for creating dynamic, visually appealing digital environments that can capture and hold the attention of young learners. I understand how to design interfaces that are intuitive and easy to navigate, which is essential for virtual classrooms.

In previous projects, I have collaborated closely with stakeholders to understand their needs and deliver solutions that work. This experience has taught me to communicate clearly, listen carefully, and adapt quickly, skills that are valuable when working with families and supporting the developmental goals of each child.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.
