I am writing to apply for the Junior Software Engineer position at Ray Sono GmbH. Your focus on modern software solutions, cross-functional collaboration, and continuous learning aligns well with my background in full-stack development and my curiosity for emerging technologies.

Through professional experience and hands-on project work, I have built scalable web applications using Laravel, Next.js, React, TypeScript, and Tailwind CSS. I have developed and integrated RESTful APIs, implemented authentication and role-based access control, and worked with both SQL and NoSQL databases. I am comfortable working across frontend, backend, and cloud environments, and I actively use modern development tools and AI-assisted workflows to improve efficiency and code quality.

In my previous role as a Web Developer, I contributed to the full lifecycle of client-facing applications. I built responsive UIs, optimized database queries, integrated real-time features using WebSockets, and deployed applications on Linux servers with Docker and CI/CD pipelines. I also participated in code reviews, technical discussions, and knowledge-sharing sessions with the team. This experience has given me a solid foundation in engineering practices and the ability to take ownership of features while learning from senior colleagues.

One area that particularly interests me is the integration of AI tools into the development process. I have worked with OpenAI APIs and Replicate for image processing in full-stack applications, and I actively explore how AI can support prototyping, testing, and automation. I am eager to bring this curiosity to Ray Sono and contribute to evaluating and adopting new approaches alongside experienced engineers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
