I am writing to apply for the Marketing Assistant Fully position at JazzUpCo. While my background is primarily technical, I bring strong organizational and automation skills that can directly support marketing workflows and operational efficiency.

Through my work as a full-stack developer, I have built systems that streamline complex processes, automate repetitive tasks, and integrate third-party services. These skills translate well into marketing support, where managing data, coordinating campaigns, and maintaining digital assets require precision and reliability.

In previous professional experience, I developed and maintained web applications using Laravel, Next.js, and Node.js, which involved managing content, user data, and real-time updates. I am comfortable working with analytics tools, databases, and cloud platforms to extract insights and maintain organized workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the JazzUpCo team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
