I am writing to apply for the Assistant Project Manager Fragrance role at Slate Brands. Your approach to building fragrance brands through an omnichannel platform and your focus on innovation and long-term brand-building resonates with how I think about delivering complex projects from concept to completion.

Through my professional experience as a Web Developer, I have coordinated end-to-end product delivery across multiple teams. At Explo-IT, I managed timelines, tracked milestones, and communicated progress and risks to stakeholders across design, engineering, and operations. I am comfortable translating creative vision into actionable deliverables and keeping multiple workstreams aligned simultaneously.

A relevant example is the Multivendor E-commerce Management Ecosystem I developed, which required coordinating across customer, seller, delivery, and logistics modules. I managed the project calendar, tracked dependencies, and ensured quality standards were met across all components. This experience taught me to proactively identify bottlenecks and communicate delays before they impacted delivery.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination skills can support Slate Brands' fragrance launches and product lines.

Sincerely,

Md Shahanur Islam Shagor
