I am writing to express my interest in joining N4 Studio's pool of freelance website copywriters and content strategists. Your approach to building a flexible, project-based relationship with trusted writers aligns well with how I prefer to work, and I appreciate the clarity in how you structure engagements.

My background is in full-stack web development, which gives me a practical understanding of how content and design interact on the page. I have written website copy for multiple projects, including a travel agency platform and a real estate application, where I developed messaging that matched each brand's voice while keeping SEO and user intent in mind. I am comfortable working in Figma alongside designers to produce content outlines and low-fidelity wireframes that support a smooth handoff.

One area that particularly interests me is the narrative and messaging strategy phase. I enjoy the process of distilling a client's value proposition into clear, compelling language that guides the rest of the site's content. I have experience presenting strategic recommendations and iterating on copy through revision rounds until it is polished and on-brand.

In addition to my technical and writing experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the possibility of contributing to N4 Studio's projects as they arise.

Sincerely,

Md Shahanur Islam Shagor
