I am writing to apply for the Senior Quality Engineer role at LawnStarter. Your platform operates at significant scale across multiple brands, and the emphasis on proactive quality, automation ownership, and AI-integrated workflows aligns closely with how I approach software engineering.

LawnStarter's marketplace model, spanning customer apps, Pro onboarding, job distribution, and data infrastructure, presents the kind of complex, cross-functional quality challenges that I find most engaging. The opportunity to shape the automation strategy and bug process from a position of influence, rather than simply executing test cases, is exactly the kind of responsibility I am looking for.

My professional experience includes building and maintaining full-stack applications with Laravel and React, which matches your core stack. I have written and maintained automated tests using PHPUnit and Jest, and I approach quality as an integral part of the development process, not a separate phase. I am comfortable reading and writing code across the stack, debugging issues from the database layer up to the UI, and writing meaningful SQL queries to validate data integrity.

I actively use AI tools in my engineering workflow to write, review, and extend code. I see AI not as an experiment, but as a practical tool for increasing output quality, reducing repetitive work, and discovering edge cases that might otherwise be missed. This aligns directly with your expectation that the person in this role will explore AI-driven approaches to improve quality operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to raising the quality ceiling at LawnStarter.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
