I am writing to apply for the Grafik Pflichtpraktikum 6 Monate position at SEVEN APICA GmbH. Your focus on building a growing brand with strong visual identity caught my attention, and I would welcome the chance to contribute to your design projects.

Although my primary expertise is in software engineering, I have developed a strong sense of design and aesthetics through years of building user interfaces. I regularly use Figma for design work and have created responsive, visually consistent layouts using Tailwind CSS and Material UI across multiple full-stack applications. I understand how design and functionality work together to create compelling user experiences.

What stands out to me about this role is the opportunity to work directly on real brand assets like social media designs, flyers, posters, and campaigns. I enjoy creative work and have experience making design decisions that balance visual appeal with practical usability. I am comfortable taking ownership of tasks and collaborating closely with a small team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently enrolled as a Software Engineering student and looking for a practical internship where I can apply my design skills and grow. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the SEVEN team.

Sincerely,

Md Shahanur Islam Shagor
