I am writing to apply for the Software Engineer, iOS Core Product role at Speechify. Your mission to remove reading barriers and your recognition as Apple's 2025 Design Award winner for inclusivity are genuinely inspiring. I want to contribute to a product that impacts millions of users, including those with learning differences.

Through my professional experience as a Web Developer, I have shipped production code, maintained complex application architectures, and worked within dedicated product teams to deliver features that scale. I have experience with Git and CI/CD infrastructure, and I write code following SOLID principles to ensure maintainability and reliability.

One area that particularly interests me is the opportunity to participate in product discussions and shape the roadmap. In my previous roles, I collaborated closely with stakeholders and engineering teammates to make thoughtful product decisions, balancing speed with quality. I am comfortable working in a flat, distributed team and know how to stay focused while delivering results consistently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to Speechify's iOS Core Product team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
