I am writing to apply for the Java Fullstack Entwickler position at Intercon Solutions GmbH. Your focus on building modern frontends for international travel software solutions aligns with my experience in full-stack development and my interest in creating user-friendly, scalable applications.

My frontend expertise includes HTML, CSS, and JavaScript, along with modern frameworks like React and Next.js. I have built responsive, SEO-friendly interfaces using Tailwind CSS and Material UI, and I am comfortable working with object-oriented architectures. I also have experience with Docker and cloud platforms such as AWS and Google Cloud, which are valued in your technology stack.

In my professional experience as a Web Developer, I developed and maintained full-stack applications using Laravel and Next.js. I built RESTful APIs, implemented authentication and role-based access control, and deployed applications on Linux servers with Nginx and Docker. I also worked on real-time features using WebSockets and integrated third-party services like payment gateways and cloud storage.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
