I am writing to apply for the Tech Lead, Android Core Product role at Speechify. Your mission to make reading accessible to everyone through text-to-speech technology is genuinely impactful, and I appreciate the focus on building products that support people with learning differences.

Through my software engineering work, I have built mobile and web applications using Kotlin, Flutter, and React Native. I have experience with Android components, real-time communication systems, and integrating APIs for authentication, payments, and data processing. I understand the importance of writing tests and maintaining clean, reliable code.

In previous projects, I developed a real-time server health monitoring dashboard using React, Node.js, and Socket.IO, and built a multi-vendor e-commerce platform with Laravel and Flutter. These experiences taught me how to own features end to end, work closely with design teams, and maintain reliability metrics under production conditions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Speechify's Android team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
