I am writing to apply for the Social Media internship at SEVEN APICA GmbH. Your focus on creativity, hands-on content production, and direct collaboration with founders aligns well with how I like to work.

Although my professional background is in software engineering, I bring practical experience with AI tools and technologies that directly support modern content workflows. Through my project work, I have integrated AI APIs such as OpenAI and Replicate for image processing and intelligent automation. I am comfortable working with video and image processing pipelines and can quickly learn tools like CapCut, Gimbal, and camera equipment.

What stands out to me about SEVEN is the emphasis on taking responsibility and shaping the brand actively rather than just following instructions. I work best when given ownership and trust, and I enjoy contributing to both creative and technical aspects of a project. My experience building full-stack applications has taught me to work independently, solve problems practically, and deliver results without needing constant supervision.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a 6-month mandatory internship where I can apply my creativity, technical adaptability, and willingness to learn. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the SEVEN team.

Sincerely,

Md Shahanur Islam Shagor
