I am writing to apply for the Sr. Recruiter / HR Manager (Top1%) role at FINE DINE Verlags GmbH. Your focus on building a high-performance team through proactive sourcing, employer branding, and AI-first HR operations stands out to me.

My technical background is in software engineering, with a strong emphasis on AI and automation. Through hands-on project development, I have built systems that integrate AI for practical tasks such as data processing, real-time analysis, and automated workflows. This experience directly supports your goal of using AI as a scaling lever for HR, including sourcing list generation, outreach personalization, and CV pre-screening.

One area that particularly interests me is building data-driven systems. I have experience working with databases, APIs, and real-time data pipelines, which aligns with your need for a data-driven approach to HR KPIs like Time-to-Hire, eNPS, and Retention. I am comfortable building automated workflows that deliver measurable results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in AI automation and systems building can contribute to FINE DINE’s growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
