I am writing to apply for the Leiter:in Presse- und ˆffentlichkeitsarbeit / PR & Social Media role at InkuPlay. Your work at the intersection of eSports, gaming, community, and digital entertainment is exactly the kind of environment where I can contribute meaningfully.

Although my core expertise is in software engineering, I have spent years working at the intersection of technology, content, and user communities. Building full-stack platforms has required me to think strategically about how information flows, how audiences engage, and how brands communicate clearly across digital channels. I understand the gaming and eSports space not just as a developer, but as someone who follows the culture, the platforms, and the communities that define it.

In my professional experience, I have managed end-to-end product communication for web platforms, including drafting clear documentation, coordinating with stakeholders, and ensuring that technical updates are communicated in accessible ways. I have also built content management systems and publishing dashboards that required careful attention to editorial workflows, content formatting, and user experience. These experiences have given me practical skills in structuring information, planning content, and maintaining consistency across digital touchpoints.

What stands out to me about InkuPlay is the opportunity to build a brand presence from the ground up in a growing startup. I am comfortable working hands-on, taking initiative, and shaping communication structures that scale. I am fluent in English and Bengali, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my background in digital platforms and community-driven development can support InkuPlay’s communication goals.

Sincerely,

Md Shahanur Islam Shagor
