I am writing to apply for the Junior Business Analyst position at FASTR Energy (formerly EGC Energie und Gebˆudetechnik GmbH) in Berlin. Your company's role as a decarbonization partner in the German energy transition is genuinely interesting, and I appreciate the opportunity to contribute during this growth phase.

Through my professional experience as a Web Developer, I have developed strong analytical and process-oriented skills. I have worked on projects that required structured documentation, data quality management, and regular reporting to stakeholders. My work involved analyzing workflows, identifying inefficiencies, and implementing improvements to ensure smooth operations across teams.

One area that particularly interests me is the combination of data analysis and project management. In my previous roles, I supported project management systems, maintained structured documentation of activities and budgets, and created regular performance reports. I am comfortable working with KPIs, ensuring data accuracy, and using digital tools to support decision-making.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical mindset, structured working style, and willingness to learn to your team. I have attached my CV for your review and look forward to the possibility of discussing how I can support FASTR Energy's continued growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
