I am writing to apply for the Social Media Manager:in (Werkstudent/Minijob/Praktikum) - Instagram role at MindElevate. What you are building with MindElevate a mental fitness app that already has strong product-market fit with over 10,000 users and a 4.8/5 rating is genuinely impressive. I would welcome the chance to contribute to growing your organic reach and building Philipp's personal brand on Instagram.

One area where I can add value is the creative use of AI tools. I have built production systems using OpenAI's API and AWS Transcribe, and I regularly work with Claude and ChatGPT to accelerate development and content workflows. I do not just use these tools as a power user I understand how they work under the hood and how to push them beyond basic prompts. This means I can help you generate ideas faster, test more formats, and refine content with real efficiency.

Beyond AI, I bring a strong visual and creative sense. I have designed and built full-stack web applications with polished UIs using Next.js, Tailwind CSS, and Material UI. This experience gives me a sharp eye for layout, typography, and what looks good visually. I am comfortable editing in CapCut or similar tools and understand how sound, pacing, and visual rhythm make content work on Instagram.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can think independently, test ideas, and take real ownership. Your description of wanting a creative sparring partner rather than just an executor matches how I prefer to work. I have attached my CV for your review and would be happy to share content samples or ideas.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
