I am writing to apply for the Mitarbeiter in der Unternehmensberatung position at Finanzberatung-Albig. Your focus on analyzing government funding programs and optimizing fixed costs for clients in energy, insurance, and banking sectors is particularly interesting to me. I appreciate the emphasis on thorough training and professional development for team members.

Through my professional experience as a Web Developer, I have developed strong skills in digital data management, structured analysis, and client communication. I have worked with databases including MySQL and PostgreSQL, performed detailed data entry and maintenance, and created preliminary evaluations to support business decisions. These technical and analytical capabilities transfer well to the consulting support role you are looking to fill.

One area that particularly interests me is the client-facing aspect of this position. In my previous roles, I regularly communicated with clients both remotely and in person, managed their requirements, and ensured accurate data handling throughout project lifecycles. I am comfortable working independently and take a structured approach to tasks, which aligns with your need for self-sufficient team members.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical mindset, technical skills, and client-focused approach to your team. I have attached my CV for your review and look forward to discussing how I can contribute to Finanzberatung-Albig’s success.

Sincerely,

Md Shahanur Islam Shagor
