I am writing to apply for the Deputy Store Manager position at Reserved Store Hannover. Reserved's approach of combining fashion with modern technology is something I find genuinely interesting, and I would welcome the opportunity to contribute to a store team that values both performance and people.

Although my professional background is in software engineering, I bring a strong affinity for technology, software systems, and data-driven processes. I am comfortable working with reports, KPIs, and benchmarks, and I understand how to use data to monitor performance, identify areas for improvement, and support operational decisions. This analytical mindset would help me contribute to the store's performance goals and quality standards.

In my previous roles, I worked closely with cross-functional teams, communicated clearly with both technical and non-technical stakeholders, and took ownership of tasks from planning through execution. I am used to working in structured environments where processes matter, but I also adapt quickly when situations require a hands-on approach. I believe this combination of process orientation and flexibility aligns well with the responsibilities of supporting store leadership and maintaining a positive shopping atmosphere.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of contributing to the Reserved team in Hannover.

Sincerely,

Md Shahanur Islam Shagor
