I am writing to apply for the Deputy Store Manager position at Reserved Store Bremen. Your description of Reserved as a fast-growing fashion company that combines trends with technology caught my attention. I appreciate the emphasis on team development, performance, and process-oriented leadership.

Although my professional background is in software engineering, I have developed strong analytical and process-driven skills that translate well into retail management. In my previous roles, I worked with KPIs, performance reports, and benchmarks to track progress and make data-informed decisions. I am comfortable with modern software systems and digital tools, which aligns with your requirement for affinity to technology.

Through my experience working in cross-functional teams, I have learned to communicate clearly, support colleagues in their development, and maintain a focus on quality standards. I approach tasks with a hands-on mentality and think holistically about how different parts of a business connect. I am used to taking ownership of outcomes and ensuring that processes run smoothly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to bring my organizational skills, technology affinity, and team-oriented mindset to the Reserved team in Bremen. My CV is attached for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
