I am writing to apply for the Filialleiter / Store Manager position at Reserved Store Bremen. Reserved's approach of combining modern fashion trends with forward-thinking technology is something I find genuinely interesting, and I appreciate the company's commitment to equal opportunity.

My professional background is in software engineering, where I have spent over four years building and managing full-stack web applications. This experience has given me a strong sense of process orientation, a hands-on mentality, and the ability to work with KPIs, reports, and structured workflows to drive performance. I am used to taking ownership of complex systems, ensuring quality standards are met, and continuously improving outcomes.

One area that particularly interests me is the role's emphasis on technology affinity and modern systems. In my previous work, I have regularly used software tools, dashboards, and data-driven approaches to monitor performance, track progress, and make informed decisions. I am comfortable learning new systems quickly and applying them to improve operational efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my process-oriented mindset, hands-on approach, and ability to work with modern systems would allow me to contribute positively to your store team in Bremen. I have attached my CV for your review and look forward to the opportunity to discuss how I can support Reserved's continued growth.

Sincerely,

Md Shahanur Islam Shagor
